Foot management / last shod or trimmed:

Saddle last checked (by who?):

Teeth last rasped (by who):

Type of bit and noseband:

Owner, please read and sign:

Merishia Massage is a soft tissue approach, working deeply yet gently, incorporating mobilisations, while working appropriately with the animal's body language responses to help release areas of tension, aid and improve range of movement, and with the aim of enhancing overall emotional and physical wellbeing.

I understand that a Merishia Massage session does not replace veterinary advice or expertise but works in conjunction with it. My vet is aware of past and current issues that my animal had / has.

My animal will not have had any new medication, vaccination or wormers within 5 days (either side) of the session.

My vet is in agreement for my animal to receive Merishia Massage for maintenance and wellbeing with Tina Chapman. (This is a requirement for all animal therapists - to ensure we are working alongside the vets, they are informed of choices that relate to health and well-being and may wish to add this information to their records.)

Should my animal become ill or injured any time between gaining vet permission and the session, I must inform my vet and Tina Chapman as soon as possible.
